<u>Survey Report from</u>

<u>WARDAK PROVINCE</u>

By

Dr. Siddiqullah Weera*

Provincial Health Director, Wardak Province
Ministry of Public Health
Interim Government of Afghanistan

October, 1989
(Mizan, 1368)

Districts Surveyed: Sayedabad, Chake Wardak and Jaghatu
Dates of Survey: 3 October 1989 - 7 November 1989 (34 days).

OBJECTIVES OF SURVEY

1- Registration of functioning clinics and Hospitals in Wardak province.

2- Registration of medical and non-medical personnel of the mentioned clinics and hospitals, particularly, for taking appropriate advantage from them.

3- Registration of locations of the clinics and hospitals, and assessment of proportion between the populations and locations of the clinics.

4- Assessment of through distances among the centers of health services.

5- Collection of informations about essential requirements and main problems , and assessments of possibilities for salving these regional problems with taking into account the periocular slanting war-circumstances.

6- Scrutinizing of the ways and possibilities for qualitative promotion of health of health services, prevention from drug-wastage, and ultimately creation of unified coordination and order among all the clinics and hospitals in this province.

7- Finding out practical ways for creation of such Coordination and reciprocal Coordination among all the centers of health services in the mentioned province.

8- Creation of Health Jihadi Shoora (War Health Council) at provincial and district levels with a view to serve as a means for the attainment of unified discipline and coordinations in health affairs.

* Translated by: A. Nasruti, Afghanistan Health Sector Support Project (MSH/Peshawar) with reference to translation by Dr. Rabani Wardak (WHO/Peshawar).

9- Determination of proper sites for fresh establishment of basic and fundamental health services and hospitals .

10- Assessment of possibilities for training doctors and medical personnel, as well as negotiations with concerned parties

11- Assessment of possibilities for establishment of a T. B. control center through authorities of the aids of WHO or its Karachi-based branch which has get a T.B. and leprosy clinics in Wardak since some years.

12- Negotiation with responsible person of Alghezali hospital concerning the expansion and promotion of preventive health activities and more particularly, about immunization program.

13- Inspecting formerly well-constructed buildings of clinic with a view to utilize them for hospitals.

Area Surveyed:

Sayedabad, Chuk and Jaghatoo districts

Area Unsurveyed:

Behsood district and the provincial center, Maydan Shar.

WARDAK PROVINCE

This province is almost silted at central part of Afghanistan, Surrounded by Kabul, Parwan, Bamiyan, Ghazni and Logar provinces. Its total area is 9,023 km2 with a papulation of 301,000 persons (census 1978, 1979). 8% to 12% residents have emigrated, while the remaining are dummying and continue their resistance against the invaders.

There are three hospitals in the districts surveyed:

Afghan-German = with 15 beds (Chake Wardak)
Alghezali hospital = with 15 - 20 beds (Lajnatul Dawa Lel Islamia)
Jaghatoo hospital = with 15 beds and 5 reserve beds (MDM)

1 . Registration of clinic and hospitals

In three districts of Sayedabad, Chuk and Jaghtoo the numbers of clinics and hospitals are as following:

A: Hospitals: 3, one at Jaghtoo belong to M. D. M. and Qazi Amin of Hezb-e-Islami, Mawlavi Khalis, and another at Tangi Sayedan of Chuk belong to Lajnatul Dawa Lel Islamia. These two hospitals are equipped and have xray, laboratory, and operating theater facilities. The Afghan-German hospital is still without x-ray, laboratory, and operating theater.

B: Health centers: 30 out of this number 3 clinics are functioning in two separate sections.

C - Health Posts: 13

Total = 3 Hospitals + 43 health centers and health posts

Health Centers		Health Posts	
Sayedabad clinics	=13	Sayedabad	=6
Chuk	=13	Chuk	=3
Jaghatoo	= 4	Jaghatoo	=4
TOTAL	=30	TOTAL	= 13

Among the Health Centers, the one at Jaghatoo is a Comprehensive Health Center and the remaining 29 are Basic Health Centers.

TABLE 1. HEALTH CENTERS AND HEALTH POSTS LINKED TO PARTIES

Name of Party	Total Number Facilities	Health Centers	Health Posts
HIA (Hekmatyar)	18	14	4

N.I.F.A	4	2	2
N.L.F.A	1	0	1
TOTAL	45	32	13

Number of clinics or hospital belonging to no parties:

1 - Alghazali hospital
2 - Afghan German clinic
3 - Leprosy clinic at Sang-e-Pul

Table 2. HEALTH CENTERS AND HEALTH POSTS LINKED TO MEDICAL COMMITTEES BASED IN PESHAWAR

Foreign Medical Committed based in Pakistan	Health Centers	Health Posts	Hospitals
Swedish Commit.	14	7	0
Lajnat Dawat Isi	6	0	1
Freedom Medicine	6	0	0
I.M.C	2	0	0
Afg-German Com.	0	0	1
M.S.H	1	0	0
M.D.M	0	0	1
LEPCO	leprosy & TB.CL	0	0
TOTAL	30	7	3

MEDICAL PERSONNEL

Total number of medical personnel in clinics and hospitals = 214

Total Number of Afghan doctors = 19
- Physicians 16
- Surgeons 3 (includes 2 Orthopedic specialists)

Number of Afghan Doctors by District

Jaghatoo district
- 2 doctors

Syedabad district
- 9 doctors:
  - 7 general physicians
  - 2 specialists

Chuk district
- 7 doctors:
  - 6 general physicians (5 male, 1 female)
  - 1 specialist

Table 3. AFGHAN DOCTORS LINKED TO PARTIES

H.I.A. (Hekmatyar)	11 Doctors
Harakat-e-Inqelab Islami	3 Doctors
Etehad-e- Islami	3 Doctors
HIA (Khales)	1 Doctors

Jamiat Islami, Mahaz-e-milli and Nijat-e-milli had no doctors in their related clinics.

Foreign doctors serve on rotation and, therefore, the number present varies from month to month and year to year. The number and origin of foreign doctors present are the time of the survey were:

Arab 6
- Physicians 3
- Specialists 3

German 2
- Physicians 1
- Specialists 1

Swiss 1 specialist

French 2 physicians

Foreigner nurses = 2 French and 1 German.

Table 4. DOCTORS LINKED TO FOREIGN MEDICAL COMMITTEES

Name of Medical Committees	Number of employed Doctors
Swedish Committee	14
Lajnat Dawat Islamia	4
Afghan German Committee	1

Numbers of students of medicines and pharmacy faculties who, own to their engagement in war, have not completed their studies:

Medicine students = 6; 3 of them are in Sayedabad district, 2 in Chuk district and one in Jaghatoo district. Their source and length of training was as follows:

Kabul Medicine faculty: 1 student from 5th. years
1 // // 3rd. //
1 // // 2nd. //

Nangahar Medicine faculty: 1 student from 2nd. years
1 // // 4th. //
1 // // 1st. //

Pharmacy students = 4; 2 of them belong to Sayedabad district and the remaining 2 to Chuk district. There amount of training was as follows:

2 students from 2nd. year
1 // // 5th. year
1 // // 1st. year

There were considerable numbers of diploma nurses, X-Ray Technicians, Lab-Technicians and Vaccinators graduated from public health institutions.

Work experience:

2 X-Ray Technician working in Alghezali hospital.
2 // // // Mujhideen Islamic Commando hospital.

2 Lab- Technician working in Alghezali hospital

4 Vaccinators are doing other medical services than Vaccination.

1 Dentist is working at Jaghatoo's Islamic Commando hospital.

Diploma nurses:

4 with much work experience

6 diploma nurses are working at Alghezali hospital.
4 // // // Jaghatoo Islamic commando hospital

Also there are 2 graduates of public health institute with great work experience.

WORK SENIORITY OF CLINICS AND HOSPITALS

Table 5. DURATION OF WORKING AT SITE- CLINICS AND HOSPITALS

Name of Clinic or Hospital	Place	Time at site
M.D.M. Hospital	Jagahto	9 Years
Salar Clinic (S.C) HIA (Hekmatyar)	Sayed abad	5 Years
Abdara Clinic Freedom Medicine Harakat-e-Inqelab Islami	Sayed abad	6 Years
3 Other Clinics		3 Years
6 Remaining Clinics		<2 Years

Uneven distribution of health facilities with respect to health needs -- particularly in Sayedabad district in first step, and in Chuk district in second step -- means some areas are under-served, while other areas are relatively over-served.

This problem which is well explanatory on the map can be easily relived if concerned parties would reach an agreement through contractive negotiations.

DISTANCES

Distances among the clinics are well explanatory on the map.

PROBLEMS

Categorically the problems are classified into 3 groups:

A - Regional problems due to lack of or shortage of clinics and medical personnel.

B - Curative and preventive problems in respect to the occurrence of diseases and main health problems .

C - And problems of each clinic and medical personnel have been specifically gathered.

These problems and difficulties can be readily resolved and met with active collaboration of PVOs, commanders and Ministry of public health as through the creation of cooperation and coordination among all the clinics and hospitals functioning in this province.

COOPERATION AND COORDINATION AMONG CLINICS AND HOSPITALS

Reciprocal cooperation and coordination among clinics and hospitals : the achievement of this aspiration is possible through the mutual well understanding between ministry public health and PVOs as NGOs from one side and on other side by virtue of direct and active cooperations of local party-commanders.

In this regard the agreement of the different local commanders has been obtained. They expressed unanimous support for the creation of a War Health Council.

WAR HEALTH COUNCIL

In such circumstances that all the clinics and hospital are still depended from the quarter of provision supply and salary to PVOs, and from the point of local conditions they are only under the influence of party commanders who do not deem themselves responsible to the ministry of public health (because neither their provision and supplies, nor their induction and dismissal are in the hand of ministry of public health) the only possible and feasible way of creating unified order and coordination among the health activities in the province is the establishment of war health committee at the level of districts and province to operate from a centralized base such a council to be formed through the parties and by the parties themselves, will be the most practical way of influential command over all the health activities as well as for the creation of a useful and effective coordination and system from every district a health personnel has been designated as a member of this council by all the parties including Hezb Islami Hekmatyar.

The chairman of district war health council will organize provincial war health council which will be presided by president of public health of the province.

As these councils will enjoy the support and protection of the parties there face the surely will be able to implement the coordinating programs at the level of the whale province.

Although it must not be left covert that the accumulation of numerous representatives of all the parties will be likely to create some problems and difficulties in practice but with the further grayish and power of the Islamic government and the establishment of the provincial presidency of public health with all its administrative organizational structures and professional programs and possibilities such a council can remain as an advisory council or if need be should be dissolved in the due course.

CHANGES ENVISIONED

1- For eventual new clinics and hospital proper sites and locations have been envisaged.

2- Regarding the training of doctors and medical personnel an agreement has been reached with Alghezalli hospital and Afghan German hospital of Chuk as well as with the Islamic commander hospital of Jaghatoo. They have promised to accept trainees and prepare special training and refresher programs for them. The schedule for the doctors and medical personnel to attend these training programs on the basis of turns will be arranged by the health council accordingly.

3- At Sang-e-Pul of Dy mardad sub district of Chuck district a Leprosy and TB clinic has been granted by a branch of WHO based in Karachi and this clinic is decided to be provided and supported by the mentioned WHO branch. For TB coverage in Wardak province they have got vast programs which we ought to negotiat in this regard with them. We also can attract the cooperations and aids of Peshawar's WHO and MSH Concerning the establishment of tuberculosis control center, hence in this regard Le Jannatal Dawatul Islimia will also extend considerable aids.

4- In regard to the programs of immunization and nutrition we can coordinate and promote the programs of Le Janntal Dawatul Islamia and MDM as they both have agreed to this point.

5- For Dr. Wegeberg surgical hospitals we have obtained 3 well constructed and concreted buildings as per following descriptions:

(1) - Concreted buildings of Dymardad sub-district which have been initially built for the use of a health clinic. They have been rooted with iron sheets and all their adjoining parts are intact. These premises have been built in 3 separate blocks of 6 rooms making a total of 18 rooms in all. But they don't have windows and doors and require small repairs and decoration.

(2) Concreted premises of Jaghatoo sub-district which have been built in 3 separate blocks with a total number of 15 rooms, have sustained much damages due to the heavy Bombardment of the Puppet regime. They don't have roof-iron-sheets, windows and doors.

(3) The concreted premises of Tangi-Syed abad including the building of teachers, boarding : These constructions have insured heavy damages and have been completely devastated.
